## INCREASE OF ARMY

Under New Order of Enlistment Will Be 18,000 Men and Officers.

### STATE LINES ARE IGNORED

The Men First Enlisting Will Be the First Mustered In and Sent to the Philippines—Colonels Appointed. Cuban War Charity Fund Used to Purchase Farm Implements.

Washington, July 7.—The order for the enlistment of volunteers for the service in the Philippine islands was issued yesterday, and seven more colonels to command the regiments were appointed. There are yet two colonels to be designated. Eight majors were also named. The colonels appointed are: Colonel Edmund Rice; Major James T. Bell, First Cavalry; Captain James E. Pettit, First Infantry; Captain Edward E. Hardin; Captain L. A. Craig, Sixth Cavalry; Captain Luther R. Hare, Seventh Cavalry; Major William Kobbe; Captain Cornelius Gardner, Nineteenth Infantry.

The recruiting will not begin until some time next week, the exact date not having been fixed yet. Recruiting stations will be open in every state and territory and as fast as the men are enlisted they will be sent to the regiments to be assigned to companies. State lines are obliterated and the men first enlisting will be the first to be mustered in. The assignment to companies will be by the officer commanding and he will be at liberty to organize a company composed of men from one state if he finds it convenient and practicable. The organization of the 10 regiments in this country will not make any difference to the organization of regiments in the Philippines by General Otis. His regiments will be in addition to those hereafter to be known as the Twenty-sixth and Thirty-fifth inclusive and will be numbered Thirty-sixth upward.

It is expected three regiments will be organized in the Philippines. The regiments organized in the United States and the Philippines will increase the army by 650 officers and 17,957 men, if there should be three full regiments formed by General Otis.

The colonels appointed yesterday are under orders to proceed at once with the organization of the regiments. Some of the officers are now in the city and have been consulting the different bureau officers with regard to equipment and supplies for the men as they join the regiments.

### CUBAN CHARITY FUND

Representatives of the Island Want It Used to Purchase Farm Implements.

Washington, July 7.—Dr. Francisco Roldan and Thorvald C. Culmelt, representatives of the Cuban committee on reconstruction, were presented to the president yesterday. They called to urge the diversion of a portion of the Cuban charity fund to the purchase of farming implements and livestock for indigent farmers instead of devoting the entire fund to the purchase of rations for the poor. The Cuban revenues, they said, were now coming in at a rate to warrant the assumption that about \$1,400,000 could be devoted annually to this purpose with profit. The president expressed interest in the project, and promised to refer the matter to General Brooke with favorable recommendation.

### Nothing From Schurman.

Washington, July 7.—Secretary Hay said yesterday that he had received no notice from President Schurman of the Philippine commission of his intention to sail immediately from Manila for home, nor any word from him since his return from his trip to the principal islands of the Philippines south of Luzon.

There is believed to be no reason why Mr. Schurman should delay his departure from Manila until later in the summer, for the indications are that there will be no change of moment in the political situation in the Philippines before the next dry season at least, and moreover, other members of the commission will remain in the islands. Mr. Schurman expects to take up his college duties this fall.

San Francisco, July 7.—The president has approved the sentence of the court-martial in the case of John M. Neal, Fourth Infantry, and the officer has been ordered to be dismissed from the military service. He was recently convicted by court-martial of violations of the army regulations in connection with the administration of the affairs of the mess fund of his company and other financial matters. He was stationed at the Presidio at San Francisco at the time of his suspension from duty.

Almost Deadlocked.

Washington, July 7.—Ambassador Choate and Lord Salisbury are almost deadlocked over the modus vivendi fixing the Alaskan boundary. Neither side will accept the provisional line proposed by the other, the Canadians demanding the inclusion of their Porcupine country and the Americans the projection of the boundary line northwesterly from a point two miles above Kluckwan.

Sixty-Six Buildings Burned.

Coulterville, Cal., July 7.—A fire broke out in the residence of Mrs. Bogliosi here. The facilities for fighting the fire were poor and within an hour the entire business portion of the town, including three hotels and four general merchandise stores, were in ashes. Altogether 67 buildings were destroyed. The loss is estimated at \$200,000.

### TWO EXTREMES

Exemplified in Returning Klondikers and Copper River Miners.

Seattle, Wash., July 7.—The two extreme results of the search for gold in Alaska were presented in strong contrast yesterday when the steamer City of Topeka arrived from the north. Miners from Dawson walked down the gangplank, trembling under the weight of the gold dust they carried. Miners from Copper River followed, staggering from weakness and disease contracted in the terrible north. The Klondikers were new suits. Those from Copper River were still in the blanket clothes they wore when they left civilization, and nearly every one had a roll of blankets under his arm. One poor Copper River miner from New York landed without a cent. A banker, hearing of his plight, purchased for him a ticket across the continent with a sleeping-car coupon, and fitted him out for new clothes.

The Topeka also brought details of the drowning of four men at Five Finger rapids. They were: L. Green, Seattle; H. Molina, Whistly Island, Wash.; H. Dingley, Victoria, B. C.; William Hoffman, Whistly Island, Wash. They were going to Dawson on a scow and when they reached the rapids they became confused and lost control of their scow. The stream carried it against the rocks and broke it into pieces. The four men were unable to swim.

The Copper River passengers number 14. They say the government relief party sent by Captain Abercrombie into the interior did a great deal of good and doubtless saved many lives. Abercrombie is some distance up the Copper River valley working on the main road to the Yukon.

Purser R. C. Jones says that the Klondikers on the Topeka placed in his care about \$300,000 in gold dust. J. T. Manion, V. W. Haywood and Judge Osterauder, who were the richest men on board, had about 400 pounds of dust between them.

### ENDEAVORERS

Delegates to Detroit Convention Over-reach the 20,000 Mark.

Detroit, July 7.—Both of the great main tents owned by the United Society of Christian Endeavor were used last night for the first time during the 18th international convention, and both contained their full quota of 10,000 people and, as usual, hundreds of others who failed to secure admittance, patiently occupied "standing room" all around the outer edges. Many visiting delegates from long distances came in yesterday swelling the number of stranger delegates, it is believed, beyond the 20,000 mark.

Ten thousand people crowded into tent Williston for last evening's exercises. The devotional exercises were conducted by Rev. W. E. Strong of Jackson, Mich., and the 10 minutes of "Quiet meditation and prayer" by Rev. Clarence E. Eberman of Lancaster, Pa. The two principal addresses were delivered by Rev. John E. Pounds of Indianapolis and Rev. D. P. S. Henson of Chicago, the former on "Dollars and Duty," and the latter on "Satan and Cities." Both were listened to with undivided attention by the great audience and bursts of applause were frequent.

### STOVES ADVANCED

Manufacturers Agree to Increase Prices Five Per Cent.

Chicago, July 7.—A general meeting of western stove manufacturers was held here yesterday behind closed doors. President Stanhope Boal of the National association, who presided, said the manufacturers had agreed to an advance of 5 per cent to take effect immediately on all stoves and ranges. President Boal said a further advance in prices is likely in the near future.

## SPANISH PRISONERS

Commission Has Arranged With Aguinaldo For Their Surrender to Spain.

Manila, July 7.—The Spanish commissioners who went to Tarlac for a conference with Aguinaldo regarding the surrender of the Spanish prisoners in the hands of the Filipinos, returned here last night. Chairman Del Rio of the commission said the release of all the prisoners had been practically arranged for, but it would be necessary to consult the Spanish government before the agreement could be ratified. He declined to give the terms of the arrangement, or to say whether these contemplated a ransom. He asserted, however, that Aguinaldo had already issued a decree for the release of the civilian officials and the sick soldiers.

The commissioners, with the remnant of the Spanish garrison of Baler, on the east coast of Luzon, and a number of civilian prisoners, were escorted by Filipino soldiers from Tarlac to the American outposts at San Fernando, and came to Manila by the night train. The heroes of the long defense of Baler, where the Spanish resisted an insurgent siege for more than a year, formed a picturesque band. Lieutenant Martin, the only surviving officer, marched them through the streets. There are only 22 and most of them are mere boys in faded blue cotton uniforms and red shirts. They are barefooted.

A crowd of Spanish men and women embraced them, weeping and shouting their praises.

They tell a remarkable story. It appears that the captain several times proposed to surrender, but the soldiers refused. Finally, some months ago, he tried to raise a white flag. Thereupon Lieutenant Martin killed him with his own sword. Their food supply gave out entirely a week ago and they surrendered to the Filipinos with all the honors of war. They were allowed to keep their arms and they say they marched from Baler, with a Filipino escort and carrying guns, through several insurgent camps, everywhere being cheered and feted.

Defenders of Baler Return to Manila. Story of Their Defense of the Garrison—Captain Attempted to Raise a White Flag and Was Killed by His Lieutenant.

## GLASSWORKERS

Unable to Secure Material to Equip Their Co-operative Factory.

Hartford City, Ind., July 7.—A number of members of the Windowglass Workers union here organized a co-operative glass company and now learn they cannot get the material for equipping their factory. When they applied to the manufacturers of flattening stones, tank blocks, floaters, ring holes and other material necessary to equip their works, they were informed that the orders cannot be filled. It is claimed that this scarcity of material is not due so much to the demand as to a corner; that the windowglass manufacturers' combine has enlisted the assistance of the material manufacturers in the campaign against the co-operative concern.

Was Stealing a Ride.

Gillman, Ind., July 7.—James Warner, a flintglass worker, was instantly killed yesterday near here while stealing a ride on a Lake Erie and Western freight train. It is supposed that he fell between the cars.

## BIMETALLIC CLUBS

Meeting Called For July 20 at Chicago For Organization Purposes.

Covington, Ky., July 7.—The organization committee of the League of Bimetallic Clubs of the Ohio Valley yesterday sent out circulars to all states inviting Democrats to meet at noon Thursday, July 20, at the Palmer House, Chicago, to devise plans for a more thorough organization, especially in the pivotal states of Ohio, Indiana, Illinois and Kentucky. The Democratic national committee will meet at the Palmer House, July 20. The circular is signed by Judge J. P. Tarvin, chairman, and Allen W. Clark, secretary.

First Application.

Toledo, July 7.—The first application for building space on the Ohio centennial grounds has been received from the Knights of Macabees, who desire to put up a \$10,000 building, to be used during the exposition as a home for the members of the order. The application has been granted.

\$120,000 Fire.

Ludington, Mich., July 7.—Fire destroyed the large Flint and Pere Marquette railroad elevator, causing a loss estimated at \$120,000; fully insured. Spontaneous combustion is supposed to have caused the fire.

Robert Bonner Dead.

New York, July 7.—Robert Bonner, publisher of the New York Ledger and owner of fast horses, died at his home in this city last night. He had been ill for some months.

Government Will Contribute.

London, July 7.—The government announces it will contribute \$15,000 (\$25,000) to the antarctic expedition fund.

W. T. ZENOR, of Corydon, will be a candidate for the democratic nomination for congressman from the third district. W. E. Cox of Jasper, Joseph Shea, of Scottsburg, and M. Z. Stannard, of Jeffersonville are also mentioned as prospective candidates.

Editor MORRIS started the trouble afresh and now every democratic paper in the state is wasting lots of good space trying to tell what constitutes a good democrat. The only trouble is there is such a diversity of opinion as to what constitutes the genuine article.

The Brownstown Banner uses every possible opportunity to show its jealousy of Seymour. We really feel sorry for a paper that is obliged to distort every fact it mentions so that it may say something spiteful about its neighbor.

The death of Bishop John P. Newman of the M. E. church removes one of the most active workers and eminent men in American Methodism. He had been in failing health for a year or more, but the immediate cause of his death was pneumonia. His home was in San Francisco.

The Vincennes Sun which has been owned by Royal E. Parcel, since 1876 has just celebrated its ninety-fifth birthday. It was founded July 4, 1804, by E. L. Stout and was the first newspaper established in the great northwest. From its present vigorous condition the paper bids fair to enjoy many years of active service yet.

Now some of the democratic papers are reading Capt. W. E. English out of the party because he has some doubts about 16 to 1 being the whole thing. The first thing the Indiana democrats know they will have deposed all their leaders but Allen W. Clark, the king of the push, and John Overmyer, who resigned the presidency of the North Vernon National Bank to become a statesman.

to the coffee drinker. Coffee drinking is a habit that is universally indulged in and almost as universally injurious. Have you tried Grain-O? It is almost like coffee but the effects are just the opposite. Coffee upsets the stomach, ruins the digestion, effects the heart and disturbs the whole nervous system. Grain-O tones up the stomach, aids digestion and strengthens the nerves. There is nothing but nourishment in Grain-O. It can't be otherwise.

## ANCIENT WATER HEATERS.

People Two Thousand Years Ago Had Some Practical Conveniences.

In two of the museums of old Roman antiquities at Naples there are several water heaters, which indicate that the principle of the water tube, the crowning feature of modern boilers, was fully understood and appreciated some 2,000 years ago. Mr. W. T. Bonner of Cincinnati has been investigating these heaters and found them to be as interesting as they are beautiful. One of them consists of an outer shell 12 inches in diameter and nearly 17 inches high, surmounted by a somewhat hemispherical shaped top. Inside this shell is an internal cylinder, also having a hemispherical top, which is 10 inches in diameter and 12 inches high. The two shells are connected at the bottom by a rim, like the mud ring of a locomotive firebox, and the space between them was filled with water. The grate was formed of seven tubes made from sheet bronze, rolled and soldered or brazed. These tubes open at both ends into the bottom of the space between the shells, thus forming a water tube grate for the fuel to rest upon.

Charcoal was probably used with this heater and was placed on the grate through an opening 4.8 inches high and 4 inches wide, closed by a beautifully decorated door. The gases from the fire escaped into the outer air through three small openings formed by tubes crossing from the inner to the outer shell about 6.6 inches above the grate. The whole apparatus was raised about 15 inches on a tripod so as to allow air to reach the fuel. In another boiler of somewhat the same type the outer shell has the form of an urn, while the inner shell rises from a water tube grate to an opening in the side. It is 12 inches in diameter at the widest part, 17.6 inches high and supported on a tripod about 4 inches high. Its general shape is much like that of the silver candelabrum known as the Paul Revere pattern, although, of course, it is much larger and has a top closed by a lid. It has been suggested that these utensils may have served at some time to heat wine as well as water, which suggestion appears reasonable, as many historians state that the Pompeians made great use of hot drinks. It may be that they were found in one of the terraced or cafes, of which there were several in Pompeii.—Boston Transcript.

## LIVING IN CITIES.

The Apartment House Is Breaking Up American Homes.

I have no mind to harrow up the minds of my readers with any explanation of the miseries and mysteries that confront the average housekeeper in the daily maintenance of a simple but comfortable existence for her family. As for herself, an existence at all seems a struggle which at times she would gladly give over. One might define a heroine as the average American woman who does her own housekeeping. But some hint of the unnatural and unhappy state of affairs existing at present may be deduced from the consideration of two economic facts.

First, woman is by nature a home founder and a homemaker. This is not intended as a statement of personal belief, but as a statement of scientific fact. It was woman—not man—who opened the industrial world. It was woman who made the first rude dwellings and dressed skins and wove textiles for clothing. It was woman and not man who made the first fire and the first utensils for cooking and the first rude tools for industrial ends. All her activities clustered about the hearth and ministered to the home. If the woman and the work had not reacted upon each other so that today women should be by nature homemakers and home lovers, there are still depths for the scientists to sound in the working of heredity and of natural selection.

And yet—here is my second fact—the enormous piles of stone and brick rapidly filling the choice plots of ground in our large cities and shutting out the light of heaven with their gabled tops are mute if not magnificent witnesses to the fact that the investment of capital is all against the perpetuation of the separate home. The shrewd modern investor is willing to put hundreds of thousands against hundreds of dollars that (for his lifetime at least) women are going to prefer the ease of the apartment hotel to the separate house with its privacy, its own table, and—alas!—its own service.—Helen Watterson Moody in Scribner's.

## OUR CANINE FRIENDS.

The famous Cuban bloodhounds are descendants of the mastiff.

The parish curs of India are the direct descendants of wild dogs.

The fossil remains of four different types of dogs have been found.

Only domesticated dogs bark. In the wild state they howl or whine.

There are 20,000 hounds in Great Britain used for hunting purposes.

Representations of the spaniel have been found on the Roman monuments of Tuscany and elsewhere.

Puppies open their eyes on the tenth or twelfth day and shed their first or milk teeth in four months.

In 1839, by an act of parliament, the use of dogs in London to draw carts as beasts of burden was abolished.

All members of the dog family seem to have a natural antipathy to cats and to all members of the cat tribe.

The average age of the dog is 10 years, but in isolated cases these animals have been known to live 20.

The bulldog has less brain in proportion to his weight than any other variety of dog, a fact which renders his training almost impossible.

The Alpine, or St. Bernard, is believed by some naturalists to be a variety of spaniel, while others consider it a descendant of the Newfoundland.

Long Irritation.  
Is the forerunner to consumption. Dr. Bell's Pine-Tar-Honey will cure it, and give such strength to the lungs that a cough or a cold will not settle there. Twenty-five cents at all good druggists.

## A HEROIC HISTORY.

The Stormy Career of the Little Island of Crete.

There are not many islands with a more stormy or more heroic history than that of Crete. In remote antiquity it was the redoubtable "island of one hundred cities" and had an illustrious line of kings, among whom were Rhadamanthus, Minos and Idomeneus. The last named led a fleet of 80 ships to assist in the conquest of Troy and was the last of what we may call the legendary kings. After him a gap of several centuries occurs, and when the record is resumed it is no longer a tale, but authentic history.

At the time of the Persian invasion of Greece the island was populous and prosperous. It was divided into several independent republics, which, like those of peninsular Hellas, were not always in peace and friendship with each other. They kept free from foreign wars, however, except as they voluntarily furnished mercenary troops to whichever side would pay the best for them. This was done in both the Persian and Peloponnesian wars, when the Cretan archers were as noted and as dreaded as those of merry England in later days.

The prowess of the ancient Cretans and their insular position kept them free from invasion down almost to the Christian era. While the eagles of Rome flapped wide wings in fiery flight over nearly all else of the known world that island retained its independence. Indeed it was only through intestine quarrels that it was at last subdued. Some 70 years before the Christian era Rome took advantage of the prevailing discord in Crete to invade the island, on the pretext that the Cretans had given aid and comfort to Mithridates and had ill treated some Roman soldiers. The first army was repulsed and almost annihilated by the Cretans.

But Rome was determined to achieve the conquest if it took the whole power of her empire. Army after army was sent, and after three years of desperate fighting Rome prevailed. For the first time in her history Crete became, in 83 B. C., subject to an alien master. From that day to the present, for more than 1900 years, she has been a conquered province, never once regaining the independence so long maintained and so reluctantly relinquished.—New York Tribune.

## Use and Abuse of Money.

There are many fellows at college who have money and use it well, but the more fact that a man has cash in his pocket does not get him on to athletic teams, or into college clubs or societies, or at the head of his class. It helps him on, if he's a good chap. It holds him back if he isn't. Then by and by, when you get through college, you will find it just the same in business of all kinds. Money seems to help a good man along and seems to be the worst enemy of a bad man. So that to think only of money first, and then of doing fine things with it after it is gained, is putting the cart before the horse. And, if you want to be in the senate, it's the wrong way to go at it to go down to South America and work in a gold mine for 20 years simply and solely to "raise the cash" for the purpose of buying the votes of a state, even if such a procedure were moral and right, which is unquestionably not the case.

Rather make up your mind what you want to do and then try to make a financial success of it as well as all other kinds of successes. If it is the hide and leather business, try to make money fairly, to learn the trade thoroughly and to keep pace with the literature, the politics, the life of your own day. If it is the ministry or law or literature, try to make both ends meet each year, and to make money just the same, but don't forget that all these branches of work require something besides cash to make them successes. In a certain way it is just as wrong to try to believe that money is an evil as it is to let yourself believe that money is the only thing worth having. It is a great good thing when you have learned how to use it and a mighty poor thing when it is abused. Decide, therefore, on what work you will set out, without regard to money, and then try to make a financial as well as an intellectual success of it.—Harper's Round Table.

## Doing His Level Best.

"Do you think, Grinly, that you do what you should to brighten your home?"

"I've put in gas, electric lights and lamps. If there's anything else to make it brighter, I'm ready to invest."—Detroit Free Press.

[LETTER TO MRS. PINKHAM NO. 40,970]

"I had female complaints so bad that it caused me to have hysterical fits; have had as many as nine in one day.

"Five bottles of Lydia E. Pinkham's Vegetable Compound cured me and it has been a year since I had an attack.

Mrs. Edna Jackson, Pearl, La.

If Mrs. Pinkham's Compound will cure such severe cases as this surely it must be a great medicine—is there any sufferer foolish enough not to give it a trial?

## WESTMINSTER ABBEY.

Something About This World Famous Old English Church.

The architecture of Westminster abbey dates back to a remote period, but long before any part of the present "glorious pile" was in existence a Saxon church stood upon the same spot. Many years before the conquest the Saxon church was connected with a monastic house of the Benedictine order, which gave the name Western monastery, or Westminster, to its place of abode, to distinguish it from St. Paul's, in London, which was known as East Minster.

Considered architecturally, the first church here of which we have any authentic history was erected by Edward the Confessor and consecrated on Holy Innocent's day, 1065. The greater part of the abbey was built by Henry III in the style known as early English. The west front, with its grandly beautiful windows, belongs to the fifteenth century, as does also the completion of the nave and the aisles. The extreme length of Westminster abbey is 511 feet, the width across the transepts is 203 feet and the width across the aisles 79 feet; the height of the roof is 102 feet.

The fortunes of the abbey have followed and are closely interwoven with those of the nation, and many, therefore, are its historical associations. There the sovereigns of England have been crowned ever since the conquest. The coronation stone, brought from Scotland by Edward I, may still be seen under the coronation chair used by Richard II. This chair has ever since been occupied by English rulers during the coronation ceremonies.

Within the walls of the abbey the funerals of many crowned heads have taken place, and sovereigns and members of royal families have graves and tombs beneath its roof. Oliver Cromwell never wore a crown, but his remains were deposited for a time in a vault beneath Henry VII's chapel with pomp never surpassed by that of royalty.

The south transept is known to the world as the "poets' corner," because there, sleeping their last sleep, are Chaucer, Spenser, Ben Jonson, Cowley, Dryden, Beaumont, Addison and Tennyson and near by are monuments to Shakespeare, Milton, Isaac Watts, Goldsmith and Johnson.

In the north transept are buried many renowned statesmen. There lie Pitt, Wilberforce, Fox, Peel, Canning and Palmerston. Many eminent divines, men of letters, generals, admirals and other persons known to fame are buried beneath the marble pavement or have monuments by its pillars or on its historic walls.—Philadelphia Times.

## FIRST WHITE HOUSE BATH.

Van Buren Was Criticized For Introducing the Tub Into the Mansion.

In an article on "The Domestic Side of the White House," in The Ladies' Home Journal, ex-President Harrison gives this interesting view of the home portion of the executive mansion: "Properly speaking," he says, "there are five bedrooms in the executive mansion, and of the end of a short hall that formerly opened to a large north window, but has now been closed up to make a small bedroom, the number may be increased to eight. There are no suitable servants' quarters. These provided are in the basement, and only those opening to the south are habitable. The north rooms open upon a damp back arena and are unhealthy. One of the basement rooms, having a southern exposure, is fitted up as a billiard room, but very plainly.

"It is said that provision for a library for the White House was first made during Mr. Fillmore's term. Next cases were arranged about the room, and most of them are filled with books—old editions of historical and classical works. There is no catalogue, and the library has not been kept up."

"President Adams introduced billiards into the White House, purchasing the first table, balls and cues at a cost of \$61, paying for them out of his own pocket. President Van Buren was searching for a political adversary and charged criticism as being the first of our presidents to discover that the pleasures of the warm or cold bath are the proper accompaniments of a palace life. For it appears that our former presidents were content with the application, when necessary, of the simple shower bath. Mr. Van Buren's critic then refers with high approval to the salutary side of Mr. Adams' heretic habit of bathing in the Potomac 'between daybreak and sunrise.'"

## NAMES OF PEARLS.

About Five Thousand Small Ones Can Be Bought For Nine Dollars.

Pearls are named according to their size. The very large are called paragon pearls; when the size of a cherry, cherry pearls; medium are called pique pearls; smallest, dust pearls. The oval and long are termed pear pearls, while badly formed specimens are known as baroque. The value of pearls varies, of course, with the quality and general colors, but the piece, seed and dust pearls always have a market price.

The cherry and paragon are sold on an entirely different basis. If many fine ones are on the market at a time, they may be had at reasonable rates. Some years they bring almost any price. The last two years especially, the dealers say, there has been a great scarcity of the pearls, although there is no falling off in the supply of the small stuff.

When a pearl exceeds one carat in weight, it is sold separately. Under that weight they are sold in parcels and become less valuable as they become smaller. The smallest dust pearls collected average about 5,000 to the troy ounce and are rated at about \$9 per ounce. If, on the contrary, one paragon weighing an ounce (or 160 carats) was on sale, it would bring any amount from \$80,000 to \$200,000, according to quality.—Philadelphia Times.

It is an easy thing to be a millionaire in Berlin. A yearly income of over \$50,000, representing the interest on 1,000,000 marks, is the qualification for that title, which is enjoyed by 2,003 Berliners.

A. STRAUSS & CO.

The First Anniversary.  
It is just a year since the Chicago, Milwaukee & St. Paul road inaugurated its celebrated Pioneer Limited passenger train service between Chicago, Milwaukee, St. Paul and Minneapolis. This service marked the new era in the railroad world in the line of passenger accommodations. At a cost of a quarter of a million dollars that progressive company furnished the traveling public, in its Pioneer Limited train, comforts and facilities the best ever produced. This train has been described many times in newspapers and magazines, but should be seen and examined to be appreciated. In beauty of finish, richness and elegance of furnishing nothing equal to it has ever been attempted by any other road. The car builders were nearly a year in completing the Pioneer Limited trains (there are two—one leaving Chicago for the west and the other leaving the Twin Cities for the east every evening in the year) and they stand today a monument to the builder's art. No regular passenger train service in America is as well known as the Pioneer Limited. From the standpoint of passenger traffic the past twelve months have been the most successful in the history of the St. Paul road, made so very largely by the Pioneer Limited. The patronage of this service is a striking illustration of the fact that the public appreciates a good thing.

National Educational Association Meeting  
For the meeting of the National Educational Association at Los Angeles, Cal., July 13-14, 1909, the Union Pacific will make the greatly reduced rate of one fare, plus 2c, for the round trip.

The excellent service given by the Union Pacific was commented on by all who had the pleasure of using it to the convention at Washington in 1908. This year our educational friends meet in Los Angeles, and members of the association and others from points east should by all means take the Union Pacific.

The service of the Union Pacific via Omaha or Kansas City is unequalled and consists of palace sleeping cars, buffet smoking and library cars, dining cars, meals a-la-carte, free reclining chair cars and ordinary sleeping cars.

The Union Pacific is the route for summer travel.

### NEW SCHOOL BUILDING

To Be Erected by the German Lutheran Church.

The German Lutheran church here has been discussing for some time the matter of erecting a new school building in keeping with their standing as a church. At their meeting Sunday the congregation decided to erect a two-story brick building on the lot back of the church and fronting on Oak street at a cost of about \$7,000. The new building will contain four school rooms and a large assembly hall, and will be a very decided improvement for the school of this church.

No Right to Uginess.

The woman who is lovely in face, form and temper will always have friends, but one who would be attractive must keep her health. If she is weak, sickly and all run down, she will be nervous and irritable. If she has constipation or kidney trouble, her impure blood will cause pimples, blotches, skin eruptions and wretched complexion. Electric Bitters is the best medicine in the world to regulate stomach, liver and kidneys and to purify the blood. It gives strong nerves, bright eyes, smooth velvety skin, rich complexion. It will make a good looking, charming woman of a run-down invalid. Only 50 cents at W. F. Peters' drug store.

### BUSINESS NOTES.

Trustee John Hamilton of Brownstown township, went to Columbus Thursday on business.

The Carter Co. have received the contract to erect three section houses at Louisville for the J. M. & I. Co.

John Robinson's Show.

Monopolies are almost exclusively organized upon the basis of giving people the least possible quantity and charging them the largest possible price for it. In plain words this is swindling. Envious inferiority sometimes calls our 'Greatest Show on Earth' a monopoly. Well, so it is; but mark well in what a different sense and upon what different principles. It gives the public a great deal more, and of a better quality, for the least possible price than was ever given before. This is the broad, honest and generous basis upon which we are monopolizing the business of traveling shows.

A visit to this great show, vastly augmented by the addition of the masterpiece of an entitled master mind King Solomon, his Temple, and the Queen of Sheba, which is replete with sacred realism, historical accuracies, biblical events, colossal processional features, bewitching ballets, sacrificial ceremonies, and the splendors and glories of the court of Solomon, the seer the patriarch and grandest and greatest of ancient kings, will prove one of the most interesting and enjoyable events of our day.

Wheat Coming In.

A large amount of wheat is being brought to the Seymour market now. A great many farmers are selling right from the machine, only putting in their granaries an amount sufficient for their seed and bread. So far they have been getting 68 cents here for good wheat. The Blush Milling Company have received several thousand bushels of wagon wheat, besides a number of cars shipped in from other points. The mill is running night and day and large shipments are being made almost daily. They have recently made several large shipments for export. J. H. Hodapp is also buying a large amount of the new crop from the farmers of this vicinity. The Hygiene Milling Company is also getting a share of the wagon wheat.

Ernest Schmidt, of Hannibal, Mo., after a visit to his uncle, Rev. Philip Schmidt went to Chicago today.

Ed. Stanfield began clerking for Joe Ryan, east of Reddington, April 12 and resigned July 6. He lost one day in the time.

"During the hot weather last summer I had a severe attack of cholera morbus, necessitating my leaving my business," says Mr. C. A. Hare, of Hare Bros., Vincennes, Ohio. "After taking two or three doses of Chamberlain's Colic, Cholera and Diarrhoea Remedy I was completely relieved and in a few hours was able to resume my work in the store. I sincerely recommend it to any one afflicted with stomach or bowel trouble." For sale by C. W. Milhous.

La Grippe is surely contagious. Dr. Miles' Restorative Nervine is a sure preventive.

"There is Nothing Hotter Than Heat, and Nothing Colder Than Cold."

Mix the two and you strike a Happy Medium. There is plenty of both in town. The Weather Clerk furnishes the Heat. Cox's Soda Fountain furnishes the Cold.

—YOU MIX THEM.

The result is pleasing, and aids you greatly in living through the heated term.

Prescription work of every description given careful attention.

### THRESHING ACCIDENT.

Millard Weddell—Badly Hurt By a Cylinder Bursting.

Yesterday afternoon while the machine owned by George W. Weddell, who lives near Medora, was threshing wheat on the farm of George Vehsage, near Brownstown, the band at one end of the separator cylinder burst and the teeth flew out with terrible force. The front end of the separator was completely wrecked. Millard Weddell who was feeding at the time had one toe cut off and received several ugly gashes in the face—one over the eye and one on each cheek. His wounds are not fatal, though very painful.
